**Title:** Impact of a web-based treatment decision aid for early-stage prostate cancer on shared decision making and health outcomes: Study protocol for a cluster randomised controlled trial

**Version:** 2  **Date:** 29 April 2015

**Reviewer:** Donna Berry

**Reviewer's report:**

The authors have addressed each criticism however the study continues to have issues in measurement and development of the intervention.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.
