Reviewer’s report

**Title:** Impairment reduction in older dizzy people in primary care: study protocol for a cluster-randomised controlled trial

**Version:** 3  **Date:** 26 June 2015

**Reviewer:** Will Whiteley

**Reviewer’s report:**

I think these are sufficient changes to the protocol. If the investigators don’t suggest any changes to the intervention over the course of the trial, there is no reason why they can’t add their treatment protocol as supplementary files (the internet has plenty of space!)

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

None
