Reviewer's report

Title: A cluster randomised feasibility trial evaluating nutritional interventions in the treatment of malnutrition in care home-dwelling adults

Version: 3 Date: 1 September 2015

Reviewer: Catherine Hankey

Reviewer's report:

Please can the researchers provide baseline assessment of food provision? Any shortfalls?

Can the researchers evaluate the interventions in terms of predicted weight change if the interventions were delivered and accepted 100%. Reader needs to appreciate the potential changes in light of those observed, aside from any power calculation excuses.

Level of interest: An article of limited interest
