Reviewer’s report

Title: The cost-effectiveness analysis of Jinqi Jiangtang tablets for the treatment of pre-diabetes: randomized, double-blind, placebo-controlled, multicenter design

Version: 8 Date: 23 July 2015

Reviewer: Linda LD Zhong

Reviewer’s report:

This article was poorly written and it seemed that the manuscript was directly translated from Chinese version. There existed lots of grammar and expression problems.

The structure and content did not follow CONSORT 2010. For example, the background was too simple and not include the key information as the explanation of rationale and specific objectives or hypotheses.

In methods part, the subtitles were not professional such as “research type” and “the model”? The compulsory contents as Trial design, Participants, Interventions were not pointed out.

Results and Discussion were also not well organized and the terms were not appropriate. There were too much and I would not listed them one by one.

In general, this article was low quality and not suitable to be published before rewriting carefully.

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
