Title: Concomitant, sequential, and 7-day triple therapy in the first-line treatment of Helicobacter pylori infection in Korea: A study protocol for a randomized controlled trial

Version: 0 Date: 14 Aug 2017

Reviewer: Sinead Smith

Reviewer’s report:

1. In the methods section of the abstract, it says standard therapy will be given for 14 days. In other parts of the manuscript it says standard therapy will be given for 7 days.

2. The more recent European Guidelines should be included (Malfertheiner 2017 PMID: 27707777)

3. The authors should further discuss the rationale for using 7 day standard triple therapy given that the clarithromycin resistance rate in Korea is high.
