Title: Enteral Nutrition Tolerance And REspiratory Support (ENTARES Study) in preterm infants: study protocol for a randomized controlled trial

Version: 0 Date: 27 Sep 2018

Reviewer: Sergio Agudelo Perez

Reviewer's report:

Dear

Best regard,

Interesting research protocol. Important knowledge generated, since the problem of feeding in the premature infant with non-invasive respiratory support is problematic and difficult to achieve full nutrition in a timely manner via enteral.

the methodological design is well planned, and is adequate to achieve the objectives planned in the protocol. The analysis plan would seem to be fine. However, it should be reviewed by an expert in biostatistics.
