**Title:** Editorial Promoting Help-seeking using E-Technology for ADolescents: The ProHEAD Consortium

**Version:** 0  **Date:** 28 Oct 2018

**Reviewer:** Catherine Ouellet-Courtois

**Reviewer's report:**

This is the protocol for a large-scale study program that entails five RCTs aimed at preventing and treating mental health problems in children/adolescents via Internet-based interventions. This is an important project, considering the prevalence of mental health problems across the lifespan and, therefore, the need to prevent mental illness early on and to destigmatize help seeking behavior for such problems. The protocol is well-written and clear enough, considering that further protocol details for each RCT are provided in each separate protocol.

I only have very few comments, related to syntax/grammatical errors in the introduction:

p.3, line 64 - I would remove the word "impairment" at the end of the sentence, as this word doesn't add to the sentence, and "reducing the onset of impairment" sounds incorrect.

p.3, line 67 - I would replace the word "barriers" by "factors" - as barriers can prevent things, but not contribute to things.

p.4, line 84 - Remove the word "disease" in "disease burden".

p.4, line 86 - Remove the word "onset" in the "reduced rates of illness onset".
