Title: Community-based interventions to prevent serious complications following spinal cord injury in Bangladesh: the CIVIC trial statistical analysis plan

Version: 0 Date: 16 Nov 2018

Reviewer: Patrick Musonda

Reviewer's report:

This paper describes statistical analysis that will be conducted in the ongoing trial. This is good practice, the protocol of the trial is already published and now the authors are publishing the planned analysis. All the planned statistical analysis are sound and I recommend the authors for this good practice of thinking through the analysis before the end of the study. I recommend this study unreservedly.
