Title: MINIMALLY-INVASIVE NON-SURGICAL VS. SURGICAL APPROACH FOR PERIODONTAL INTRABONY DEFECTS: A RANDOMISED CONTROLLED TRIAL

Reviewer's report:

Dear Authors,

the paper is well written and the findings will add some interesting insight to the literature. I just have few considerations

1-CAL "clinical attachment loss" shoude be changed to "clinical attachment level" gain (CAL gain)

2- small detail, why prescribe chlorhexidine 3 times a day, since its substantivity lasts for 12 hours, and therefore being recommended its use two times a day
