Reviewer’s report

Title: Enoxaparin for primary thromboprophylaxis in ambulatory patients with coronavirus disease-2019: a structured summary of the study protocol for the multicentre randomized controlled OVID trial.

Version: 0 Date: 10 Aug 2020

Reviewer: Kirsty Loudon

Reviewer's report:

Reviewer report summary:

Review #2
The summary is now comprehensive and well written, conforming to the COVID-19 study protocol structured summary template.

Review #1
Thank you for submitting a summary to Trials to publish alongside your trial protocol. This is a well written comprehensive structured abstract for a protocol for a randomized controlled trial to determine if Enoxaparin for primary thromboprophylaxis improves survival and reduces hospitalizations in ambulatory patients with coronavirus disease-2019.

There have been some minor copy-editing changes including the TITLE to ensure it is in the standard format.

Comments.

INTERVENTION AND COMPARATOR: Perhaps in response to the query from my colleague regarding "Patients randomized to the comparator group will receive no treatment.", the follow up sentence, assuming correct, could be that all patients will receive standard care for COVID-19 if their condition should worsen and they are hospitalized. I believe this may be in section 7.4 of the protocol although condition worsening due to COVID-19 is not specifically referred to.

I have no further comments.

Thank you!

Publons Reviewer Recognition. Springer Nature can send verification of this review directly to Publons (a subsidiary of Clarivate Analytics). If you would like to take advantage of this service, please click on the “Yes” option below. Your name, email address, title of the reviewed manuscript, name of the journal, and date of your review submission (the “Review Data”) will then be transmitted to Publons upon publication of the manuscript. If you have already registered at Publons, they will notify you of the receipt of this review and update your profile as per your settings and their policy. If you are not registered with Publons, you will receive an email from
them asking you to register in order for them to be able to recognize your review on your new profile page. Publons may use the Review Data to generate derivative metadata for the benefit of Publons and you as a reviewer, carefully considering the sensitivity of such information. For example, Publons may verify your record as a reviewer by updating your profile published on its webservice if you have registered for such service or help editors to identify candidate reviewers.
