Reviewer's report

Title: A three-arm, multicenter, open-label randomized controlled trial of hydroxychloroquine and low-dose prednisone to treat recurrent pregnancy loss in women with undifferentiated connective tissue diseases: Protocol for the immunosuppressant regimens for Living FEtuses (ILIFE) Trial

Version: 1 Date: 02 Apr 2020

Reviewer: Amy Charlotte Brenner

Reviewer's report:

I would like to thank the authors for addressing my comments. I have a just one minor comment outstanding:

Exclusion criteria are applied at the point of screening for eligibility before randomisation. 'Woman impossible to follow-up' is not an exclusion criterion because you cannot know at the point of randomisation who will be lost to follow-up. While these women will be omitted from the analysis as they won't have outcome data available, this should not be listed in exclusion criteria.

Best of luck with the trial!

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
Please indicate the quality of language in the manuscript:
