Reviewer’s report

Title: Are we missing opportunities? Physiotherapy and physical activity promotion: a cross-sectional survey.

Version: 0 Date: 19 Oct 2017

Reviewer: Jonathan Williams

Reviewer’s report:

Many thanks for submitting this paper to BMC Sport science, medicine and rehabilitation. Overall the work is sound however I have a few comments which need to be addressed.

Line 77 - how were the binary variables created?

Line 101 - if 379 were required why were only 257 recruited?

Line 105 - were incomplete data set omitted?

Results should include the overall variance explained by the model.

Line 154 - Shirley citation not correct.

Line 356 - why are p - significances reported here? There are none in the table.

The actual statistical data is almost completely omitted from the text. It seems very much a bolt on. What is the purpose of doing these statistics? This is not clear from the text. As an example a search of the text for Odds Ratio yields no hits - yet it is present in table 3. Please integrate and discuss the 'results' if this is to be included as a part of this manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
