Title: Attitudes and Behavior related to Performance-Enhancing Substance Use among Elite Saudi Football Players

Version: 1 Date: 01 Mar 2019

Reviewer: Andrzej Pokrywka

Reviewer's report:

1) In the parts discussion and results, there is the phrase "our study". In the manuscript I did not find any information about other co-authors or co-workers than primary author.

2) Table 2 - In reply to reviewers Author wrote: "The test results for column 3 are the same as in column 2 ( from 1 to 7 ), so I did not repeat it in column 3." I have been misunderstood.

   In Line "Doping susceptibility" - In column 3 the response scale (range) is given only (from 1 to 7). There are no answers from the respondents, just like in the following lines. (e.g. 5 participants answered 7 = 1.2%; etc.)
