Reviewer's report

Title: Urethral caruncle in a 9-year-old female: A rare case report and review of the literature

Version: 4 Date: 18 November 2014

Reviewer: Udo Rolle

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is an interesting and well written case report. It describes a clear rare finding. The urethral caruncle is rare in childhood, but could obviously occur. The only further comment I have to make is, that a number of 11 authors is excessive for a case report.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
