Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The authors have satisfactorily answered the comments made earlier. However some changes are still required in the manuscript before accepting it for publication.

- There are too many figures and many of them are repetitive eg Figures 3, 5 and 7 may be deleted.
- Please mark the horizontal axes of Figures 9 and 10.
- Please avoid using contractions eg shouldn’t on Page 2 in conclusion
- Please define the short form at the first instance of its appearance eg B19V in Introduction on Page 1, and hpf on Pg 4 in case presentation.
Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
