Reviewer’s report

Title: Tuberculosis presenting as multiple intramuscular nodules in a child: a case report

Version: 2 Date: 21 December 2014

Reviewer: Konstantinos Zorbas

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

1) In line 137, 2th word you write “of tubercular lesions”, I believe it’s better “from tubercular lesions”

2) The lines 136-140 need some corrections because this phrase it’s too long with many “and”

3) In line 144 after “chest x-ray” needs a comma “,”

4) In line 147 the last word “of” unnecessary

Level of interest: An article of importance in its field
Quality of written English: Needs some language corrections before being published
