Reviewer's report

Title: Solitary metastasis to the breast after complete resection of encapsulated type AB thymoma: a case report

Version: 2 Date: 8 December 2014

Reviewer: Fevziye Kabukcuoglu

Which of the following best describes what type of case report this is?: An unexpected association between diseases or symptoms

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The case is rare and worth reporting, but some revisions are needed. The English is poor especially in the case report and pathological findings. The follow-up of the patient needs to be given. The references need to be updated. The most recent one dates 2010.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
