Reviewer's report

Title: Multiple Intracardiac Masses: Myxoma, Thrombus or Metastasis: A Case Report

Version: 6 Date: 12 May 2015

Reviewer: Akihiko Ikeda

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Do you believe the case report is authentic?: Yes, I do

Do you have any ethical concerns?: No, I didn’t

Is the Abstract representative of the case presented?: Yes, it is.

Does the Introduction explain the relevance of the case to the medical literature?: No. Cardiac myxoma is rare, but many literatures about cardiac myxoma have been previously reported. To compare with previous reports, I think that this manuscript cannot explain its originality.

Does the article report relevant patient information?: Yes

Does the article report relevant physical examination findings?: Yes

Does the article report important dates and times in this case?: Yes

Does the article report the diagnostic assessments?: Yes

Does the article report the types of intervention?: Yes

Does the article report a summary of the clinical course of all follow-up visits?: Yes

Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?:
No. As mentioned above, cardiac myxoma is a well-known disease. The authors should discuss why RA myxoma was accompanied by LV thrombi.

**Does the case represent a useful contribution to the medical literature?:**
No. Surgery for removal of cardiac tumors should be performed immediately.

**Is the anonymity of the patient protected?:**
Yes

**Additional comments to authors?:**
Again, the authors should discuss why RA myoma was accompanied by LV thrombi. In addition, I think that surgical treatment for this patient should be performed immediately.

**Level of interest:** An article of limited interest

**Quality of written English:** Needs some language corrections before being published

**Declaration of competing interests:**
None declared.
