Reviewer's report

Title: Urethral stricture secondary to self-instrumentation due to delusional parasitosis

Version: 4  Date: 27 June 2015

Reviewer: sachin Yallappa

Which of the following best describes what type of case report this is?: New associations or variations in disease processes

Do you believe the case report is authentic?:

yes

Do you have any ethical concerns?:

no

Is the Abstract representative of the case presented?:

yes

Does the Introduction explain the relevance of the case to the medical literature?:

yes

Does the article report relevant patient information?: Yes

Does the article report relevant physical examination findings?: No

Does the article report important dates and times in this case?: Yes

Does the article report the diagnostic assessments?: No

Does the article report the types of intervention?: Yes

Does the article report a summary of the clinical course of all follow-up visits?: No

If any information is missing from the reporting, please detail it here.: No

Is the interpretation (discussion and conclusion) well balanced and
supported by the case presented?:
yes

Does the case represent a useful contribution to the medical literature?:
I agree this may be a rare case presentation in psychiatric cases but this is not a rare condition to note. Urethral instrumentation has always got the risk of urethral stricture.

Was written informed consent to publish this case obtained?: Yes

Is the anonymity of the patient protected?:
yes

Additional comments to authors?:
No

Level of interest: An article of limited interest

Quality of written English: Acceptable
