Reviewer's report

Title: Fatal Coma in A Young Adult due to Late-Onset Urea Cycle Deficiency presenting with a prolonged seizure: A Case Report

Version: 3 Date: 30 August 2015

Reviewer: Arturo Tamayo

Which of the following best describes what type of case report this is?: An unexpected association between diseases or symptoms

Do you believe the case report is authentic?:

This article is very much authentic and represents a fatal manifestation of a rare disease seen in adults.

Its valid due to the fact that should be thought among patient with unexpected hyperammonemia and coma.

Do you have any ethical concerns?:

No

Is the Abstract representative of the case presented?:

The abstract is very well written providing the reader a good glance of the paper in general.

Does the Introduction explain the relevance of the case to the medical literature?:

Yes

Does the article report relevant patient information?: Yes

Does the article report relevant physical examination findings?: Yes

Does the article report important dates and times in this case?: No

Does the article report the diagnostic assessments?: Yes

Does the article report the types of intervention?: Yes

Does the article report a summary of the clinical course of all follow-up visits?: Yes
If any information is missing from the reporting, please detail it here.

It will be very interesting to add a representative EEG.

Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?:

Yes it is

Does the case represent a useful contribution to the medical literature?:

I do believe so.
This is an uncommon cause of comma and certainly should be in the differential. This paper does enhance this aspect.

Was written informed consent to publish this case obtained?: Yes

Is the anonymity of the patient protected?:

yes.

Additional comments to authors?:

This is a good case.
Thanks for sharing.
