Reviewer's report

Title: Erythema Nodosum as a result of Oestrogen Patch Therapy for Prostate Cancer: A Case Report

Version: 2 Date: 11 August 2015

Reviewer: Markus Meissner

Which of the following best describes what type of case report this is?: An unexpected event in the course of observing or treating a patient

Do you believe the case report is authentic?: yes

Do you have any ethical concerns?: no

Is the Abstract representative of the case presented?: yes

Does the Introduction explain the relevance of the case to the medical literature?: yes

Does the article report relevant patient information?: Yes

Does the article report relevant physical examination findings?: Yes

Does the article report important dates and times in this case?: Yes

Does the article report the diagnostic assessments?: Yes

Does the article report the types of intervention?: Yes

Does the article report a summary of the clinical course of all follow-up visits?: Yes

If any information is missing from the reporting, please detail it here.: a photo of the clinical efflorecences is missing as well as a histology

Is the interpretation (discussion and conclusion) well balanced and
supported by the case presented?:
A picture is missing proving that it really was a EN

Does the case represent a useful contribution to the medical literature?:
yes

Was written informed consent to publish this case obtained?: Yes

Is the anonymity of the patient protected?:
yes

Additional comments to authors?:
The case is interesting. But the authors have to provide at least a photo...a histology would be perfect

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Declaration of competing interests:
no competing interests
