Title: Partial Response of Pulmonary Adenocarcinoma with Symptomatic Brain Metastasis to Nivolumab plus High-Dose Oral Corticosteroid: A case report

Version: 0 Date: 03 Jan 2017

Reviewer: Shaun Colburn

Reviewer’s report:

It is an article with clinical importance but one major issue is that you find symptomatic improvement with steroid use for brain lesion symptoms - this is not unique. Beyond this, there are a couple issues that I recommend you work on prior to publication: 1) have someone edit the grammar and punctuation; 2) be more specific within the article i.e. specify what corticosteroid and describe the lesions seen on imaging; 3) use the same description of the type of lung cancer throughout the article.
