Reviewer’s report

Title: Congenital Cystic Adenomatoid Malformation: dangers of misdiagnosis (a case report)

Version: 0 Date: 07 Dec 2016

Reviewer: AMINE HAMMA

Reviewer’s report:

- In your abstract, one or two lines focusing on discussion would be desirable

- Lines 19 and 21 of page 5, mg/kg/j must be changed into mg/kg/day

- Lines 32-35 of page 5, replace "The re-reading of scanner plates, by experimented radiologist with the help of scanner plates, with the help of pediatric surgeons, evoked the diagnosis of CCAM." By "The re-reading of scanner plates, by experimented radiologist with the help of pediatric surgeons, evoked the diagnosis of CCAM."

- The right column of the Page 6, it is better to write «5 hours postoperative: death» instead of «5 postoperative hours: death».

- In order to reach your goal of facilitating the diagnosis of this disease, it would be better to detail more the typical radiological aspect of the CCAM at the CT scan which remains a key element for the diagnosis.

- Your article allows us to learn more about the severity of CCAM and its misdiagnosis
