Title: Enterogenous cyst of pediatric testis: A case report

Version: 0 Date: 06 May 2017

Reviewer: Francisco La Rosa

Reviewer’s report:

This case shows a very interesting and rare finding; however, it is poorly written and the information is not objective. Just to say that this pathology is rare, it is not enough, you need to mention how many cases have been reported in the literature review, and the references are also poor and not complete. The English grammar is also poor and with too many errors. I would consider publication after significant changes have been made in the text. In addition, it would be necessary to discuss why this tumor is just a cyst, even though it had that appearance, and it is not considered a teratoma; how do you make a differential diagnosis between these two entities?
