Reviewer’s report

Title: Bilateral blindness secondary to optic nerves ischemia from severe amlodipine overdose - A Case Report

Version: 0 Date: 19 Apr 2017

Reviewer: S. Calvin Thigpen

Reviewer's report:

While the story of the initial interventions and then subsequent successful attempt to recover the patient to some meaningful function are interesting, it is not necessarily unique to have a patient with pre-existing optic nerve damage develop blindness after severe hypotension from an antihypertensive overdose.
