Reviewer’s report:

About the paper "Mesh penetrating the cecum and bladder following inguinal hernia surgery: a case report".

The authors presented a well detailed case report about a patient with a migration of a prostesis inside the cecum and in contact with the bladder.

The reviewer would like to thank the authors for this article, and offer a few comments and questions.

- English should be revised

- What do you mean by "intestinal fluid fistula"? [Page 3 - Line 9]

- Did you administer antibiotics to the patient?

- How could you identify a swelling of the left epididymis using an echocardiography? [Page 4 - Line 6]

- I do not understand why you created a temporary bladder fistula. [Page 4 - Line 15]
