Reviewer’s report

Title: Isolated unilateral adrenal gland hemorrhage following motor vehicle collision. A case report and literature review.

Version: 0 Date: 19 Aug 2017

Reviewer: Shawqi Arafat

Reviewer's report:

1. Do you believe the case report is authentic?

No

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments:

no

3. Does the Introduction explain the relevance of the case to the medical literature?

Yes

4. Does the article report the following information? Where information is missing, please specify.

a. The relevant patient information, including:

   - De-identified demographic information (age, gender, ethnicity)
   - Main symptoms of the patient
   - Medical, family and psychosocial history
   - Relevant past interventions and their outcomes
b. The relevant physical examination findings

Yes

c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at $T = 0$, follow up at $T = 1$ month.

Yes

d. Diagnostic assessments, including:
   - Diagnostic methods
   - Challenges (e.g., financial, language/cultural)
   - Reasoning and prognostic characteristics (e.g., staging), where applicable

Yes

e. Types and mechanism of intervention

Yes

f. A summary of the clinical course of all follow-up visits

Yes

Comments:

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments:

the discussion needs to be more about the current case although the authors did a good job in comparing it to the other cases.
the conclusion must be more directed to the medical value of this case and how it would rich the medical literature in the future

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes

7. Is the Abstract representative of the case presented?

Comments: yes

8. Does the case represent a useful contribution to the medical literature?

Comments:

not too much as the differences between this case and the others are not significant

9. Additional comments for the author(s)?

i would like to the thank the authors for their efforts in presenting the case but the message that the authors want to deliver is not clear as the case is similar to the other cases published before. it would be better if the case is directed toward the important signs and diagnostic challenges to reach a solid diagnosis of unilateral AGT and showing the importance of diagnosing such a case
