Title: Burkitt's Lymphoma With Placental Invasion Diagnosed At Cesarean Delivery: A Case Report

Version: 0 Date: 25 Sep 2017

Reviewer: El Bairi Khalid

Reviewer's report:

This is an important case report, some suggestions are given to improve the quality of the paper:

1-Major concerns:
   - Your background section is too short, it must provide detailed data about this rare case, you can use data from this recent paper published in Lancet: http://www.thelancet.com/journals/lancet/article/PIIS0140-6736(11)61177-X/fulltext
   - Figure 1: change the colors of the arrows.
   - Please provide the Fluorescent in situ hybridization analysis of C-myc translocation for the newborn infant.
   - The quality of the histopathology examinations' figure is too low. Please provide them as TIFF with high-quality resolution.
   - It is well known than Burkitt's lymphoma develops in immunocompromised patients. Why didn't you look for HIV in this patient?

2-Minor concerns:
   - There are many spelling mistakes in the manuscript. Please check/correct.
   - Check carefully the instructions to the authors of the journal.
   - Other abbreviations were used in the text but not found in the list of abbreviations. Please add them all.
