Reviewer's report:

Dear authors,
Thank you for your efforts to improve the quality if this paper. Before a formal acceptation. Your manuscript still needs some minor revisions.

1- After the discussion and conclusion section, please remove: "Written informed consent was obtained from the patient for publication of this case report and any accompanying images. A copy of the written consent is available for review by the Editor-in-Chief of this journal" because you have already said that in the Declarations section.

2- Figure 2: You said that it contains an arrow and "T" but they are absent in the picture!!. In addition: you mentioned "hemotoxylin-eosin stains" and just after that, you use an abbreviation: "H & E". Be careful with these minor details! Check in the whole manuscript. If you want to show the increased mitotic activity then increase the size of the picture or open a window inside the figure.
