**Reviewer’s report**

**Title:** Multiple cutaneous metastasis of synchronous urtothelial Carcinoma of the bladder and the renal pelvis: a case report

**Version:** 0 **Date:** 11 Jan 2019

**Reviewer:** Joao Italo Fortaleza Melo

**Reviewer's report:**

1. Do you believe the case report is authentic?

Yes/No

Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments:

Is consent important, if necessary and possible can it be achieved?

3. Does the Introduction explain the relevance of the case to the medical literature?

Yes/No

Yes.

4. Does the article report the following information? Where information is missing, please specify.

a. The relevant patient information, including:

   - De-identified demographic information (age, gender, ethnicity)
   - Main symptoms of the patient
   - Medical, family and psychosocial history
   - Relevant past interventions and their outcomes

b. The relevant physical examination findings
c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at $T = 0$, follow up at $T = 1$ month.

d. Diagnostic assessments, including:
   - Diagnostic methods
   - Challenges (e.g., financial, language/cultural)
   - Reasoning and prognostic characteristics (e.g., staging), where applicable

e. Types and mechanism of intervention

f. A summary of the clinical course of all follow-up visits

Comments: I felt a lack of greater approach to clinical outcome. In the other options above he is well compelled.

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments: Yes, but I would like more information on the case.

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes/No

Yes, the patient's anonymity is protected.

7. Is the Abstract representative of the case presented?

Comments: Yes, I consider it appropriate.

8 medical literature?

Comments: Some articles could not be found in indexing on the platforms, it would be good to use well indexed references.
9. Additional comments for the author(s)? I suggest, a little more text related to the case, I found the introduction lengthy and little approach to the case itself. I recommend in the images if possible an image of the histological section where the analysis was made, because you describe this data
