Reviewer’s report

Title: Denosumab improves clinical manifestations of hypophosphatemic osteomalacia by adefovir - induced Fanconi syndrome: A case report

Version: 0 Date: 15 Jan 2019

Reviewer: Narothama Reddy Aeddula

Reviewer’s report:

1. Do you believe the case report is authentic?

Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments: No

3. Does the Introduction explain the relevance of the case to the medical literature?

Yes

4. Does the article report the following information? Where information is missing, please specify.

   a. The relevant patient information, including:

      - De-identified demographic information (age, gender, ethnicity)
      - Main symptoms of the patient
      - Medical, family and psychosocial history
      - Relevant past interventions and their outcomes

   b. The relevant physical examination findings

   c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including
time relevant to initial presentation, i.e., initial presentation at \( T = 0 \), follow up at \( T = 1 \) month.

d. Diagnostic assessments, including:
   - Diagnostic methods
   - Challenges (e.g., financial, language/cultural)
   - Reasoning and prognostic characteristics (e.g., staging), where applicable

e. Types and mechanism of intervention

f. A summary of the clinical course of all follow-up visits

Comments:

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments: Yes

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes

7. Is the Abstract representative of the case presented?

Comments: Yes

8. Does the case represent a useful contribution to the medical literature?

Comments: Yes

9. Additional comments for the author(s)?

Kunii et al., report a single case of 'Successful treatment of hypophosphatemic osteomalacia induced by Adefovir, with Denosumab'
The article is well written, and authors have done an excellent job in the preparation of the manuscript.

I have the following comments and suggestions,

1. Title: Is long and confusing. Need to make it short and simple

2. Please include patients past medical history, medications, social and family history in the presentation.

3. Please describe the treatment and dosing schedule of the denosumab. How long and what dose of denosumab was administered and when was it stopped.

4. Please comment on the patients status on the follow-up as he received the treatment in 2016.

Thank you for submitting the manuscript to the JMCR.

Level of interest
