Reviewer’s report

Title: Guillain-Barre syndrome with associated unilateral ptosis without ophthalmpoplegia- A rare presentation: A case report and review of literature

Version: 0 Date: 05 Jun 2019

Reviewer: Hector Diaz

Reviewer's report:

1. Do you believe the case report is authentic?

YES

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments: I do not have any ethical concern

3. Does the Introduction explain the relevance of the case to the medical literature?

YES

4. Does the article report the following information? Where information is missing, please specify.

a. The relevant patient information, including:
   - De-identified demographic information (age, gender, ethnicity)
   - Main symptoms of the patient
   - Medical, family and psychosocial history
   - Relevant past interventions and their outcomes

b. The relevant physical examination findings
c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at \( T = 0 \), follow up at \( T = 1 \) month.

d. Diagnostic assessments, including:
   - Diagnostic methods
   - Challenges (e.g., financial, language/cultural)
   - Reasoning and prognostic characteristics (e.g., staging), where applicable

e. Types and mechanism of intervention

f. A summary of the clinical course of all follow-up visits

Comments: All above items are declared in the text of manuscript

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments: I considered the interpretation is suitable

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

The patient can be identified in the photo, but the author declared it authorized the publication of the images.

7. Is the Abstract representative of the case presented?

Comments: I considered the abstract is representative of the case
8. Does the case represent a useful contribution to the medical literature?

Comments: Yes

9. Additional comments for the author(s)? I have nothing further to comment
