Title: A case report of unknowing ingestion of Brugmansia Suaveolens Leaves presenting with signs of Anticholinergic Toxicity

Version: 1 Date: 20 Jul 2019

Reviewer: Q X Ng

Reviewer's report:

There are still some content and language issues that should be addressed before publication.

- What exactly is a "kanji drink"? As this is rather cultural, some context and explanation would be helpful for readers. Would the process of fermentation affect the resultant toxicity?

- Please change "this plants toxicity" to "this plant's toxicity.

- Please change "She is not a known patient with a psychiatric illness" to "She had no history of psychiatric illness".

- Please change "bloodpressure" to "blood pressure".

- Please change "were adviced" to "were advised".

- Please change "on degree of awareness of toxicity of toxic plants" to "based on the knowledge of toxic plants in the Sri Lankan community".

- Please change "leaves also have a significant degree of toxicity" to "its leaves can have significant toxicity".
