Version: 0 Date: 11 Jun 2019

Reviewer: Tomas Toporcer

Reviewer's report:

1. Do you believe the case report is authentic?
   Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.
   Comments: no

3. Does the Introduction explain the relevance of the case to the medical literature?
   Yes

4. Does the article report the following information? Where information is missing, please specify.
   a. The relevant patient information, including:
      - De-identified demographic information (age, gender, ethnicity) - yes
      - Main symptoms of the patient - yes
      - Medical, family and psychosocial history - yes
      - Relevant past interventions and their outcome - yes
   b. The relevant physical examination findings - yes
   c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at $T = 0$, follow up at $T = 1$ month.
      Identification of the patients is impossible.
   d. Diagnostic assessments, including:
      - Diagnostic methods
      - Challenges (e.g., financial, language/cultural)
      - Reasoning and prognostic characteristics (e.g., staging), where applicable.
      Data of the patients evaluation is sufficient.
   e. Types and mechanism of intervention
Description of the intervention is ok.

f. A summary of the clinical course of all follow-up visits

Comments: Follow up is limited. This data are not necessary for this type of article.

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?
   Comments: Discussion is very well focused on patients diagnosis and therapeutic intervention.

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.
   Yes Patients data in the picture are deleted.

7. Is the Abstract representative of the case presented?
   Comments: Abstract include case reports. Discussion and background are limited by number of words. Abstract is acceptable.

8. Does the case represent a useful contribution to the medical literature?
   Comments: yes

9. Additional comments for the author(s)? no additional comment
