Reviewer’s report

Title: Emergency Laparoscopic Repair of Coitus Induced Vaginal Cuff Dehiscence – A case Report

Version: 0 Date: 21 Nov 2019

Reviewer: Felix Mwembi Oindi

Reviewer's report:

1. Do you believe the case report is authentic?
   Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.
   Comments:
   No

3. Does the Introduction explain the relevance of the case to the medical literature?
   Yes

4. Does the article report the following information? Where information is missing, please specify. Yes
   a. The relevant patient information, including:
      - De-identified demographic information (age, gender, ethnicity)
      - Main symptoms of the patient
      - Medical, family and psychosocial history
      - Relevant past interventions and their outcomes

   b. The relevant physical examination findings
      Yes

   c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at T = 0, follow up at T = 1 month.
      Need to include followup after leaving hospital

   d. Diagnostic assessments, including: Included
      - Diagnostic methods
      - Challenges (e.g., financial, language/cultural)
      - Reasoning and prognostic characteristics (e.g., staging), where applicable

   e. Types and mechanism of intervention
      Included

   f. A summary of the clinical course of all follow-up visits
5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?
Comments: Yes

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.
Yes

7. Is the Abstract representative of the case presented?
Comments: Yes

8. Does the case represent a useful contribution to the medical literature?
Comments: Yes

9. Additional comments for the author(s)? Given that there was evidence of pelvic infection at the time of presentation, was any culture of the pus taken? Were there any other features of sepsis? It is important to give the clinical state after discharge say at 3 or even 6 months. Was recovery full or was there any delayed vault infection.
