**Reviewer’s report**

**Title:** Hemoperitoneum due to Bleeding from a Vein Overlying a Subserous Uterine Myoma: A Case Report

**Version:** 1  **Date:** 13 Feb 2020

**Reviewer:** Hürriyet Cetinok

**Reviewer's report:**

1. Do you believe the case report is authentic?
   Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.
   Comments:
   All applicable consents were obtained as per the manuscript.

3. Does the Introduction explain the relevance of the case to the medical literature?
   Yes

4. Does the article report the following information? Where information is missing, please specify.
   a. The relevant patient information, including:
      - De-identified demographic information (age, gender, ethnicity)
      - Main symptoms of the patient
      - Medical, family and psychosocial history
      - Relevant past interventions and their outcomes
   All included
b. The relevant physical examination findings

Included

c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at T = 0, follow up at T = 1 month.

Acceptable

d. Diagnostic assessments, including:

- Diagnostic methods
- Challenges (e.g., financial, language/cultural)
- Reasoning and prognostic characteristics (e.g., staging), where applicable

Acceptable

e. Types and mechanism of intervention

Acceptable

f. A summary of the clinical course of all follow-up visits

Comments: Acceptable

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments:

Acceptable
6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes

7. Is the Abstract representative of the case presented?

Comments:

Acceptable

8. Does the case represent a useful contribution to the medical literature?

Comments:

As it mentioned in the study; women with acute abdominal pain and a history of uterin leiomyoma, there is a possibility which is rare but can be life threatening complication as hemoperitoneum!

9. Additional comments for the author(s)?

1. Page 2, line 56: sub serous- it is not separated word.

2. Page 3, line 28: it should be great to describe the blood pressure, why it was only 80 mmHg

3. It should be better, to add sonographic images or give the reason why they were absent in this article!

Level of interest
Please indicate how interesting you found the manuscript:

An article of limited interest
