Reviewer’s report

Title: Pharmacotherapies for fatigue in chronic liver disease (CLD): a systematic review and meta-analysis (protocol)

Version: 1 Date: 02 Dec 2017

Reviewer: Chaturaka Rodrigo

Reviewer’s report:

The article has improved after the corrections and language editing.

I have noted some minor errors;

Under study design "...individual studies must have assessed fatigue as ....."

Under interventions > comparators> Other pharmacological interventions

Under data extraction, you have mentioned "sponsor and status". What is meant by status is unclear,

Attrition rates and loss to follow up anyway have to be reported but they should not be used as surrogate outcomes to assess fatigue

In risk of bias section there is no need to explain what allocation concealment, random sequence generation etc is
