Reviewer's report

Title: Network meta-analysis of randomised trials of pharmacological, psychotherapeutic, exercise and collaborative care interventions for depressive symptoms in patients with coronary artery disease: hybrid systematic review of systematic reviews protocol

Version: 0 Date: 12 Nov 2018

Reviewer: Eddie Kane

Reviewer's report:

Excellent protocol in an important area. Method choice will give an opportunity to surface evidence in well structured way and the issue of transitivity is dealt with well as are the options for reporting the review using Rankograms which are useful for clinicians (obviously accompanied by the details of effect sizes). No hesitation in recommending for publication

Level of interest

Please indicate how interesting you found the manuscript:

An article of importance in its field that should be highlighted to relevant networks

Quality of written English

Please indicate the quality of language in the manuscript:
