Title: Acculturation and mental health among adult forced migrants: A meta-narrative systematic review protocol

Version: 1 Date: 28 May 2019

Reviewer: Serap Keles

Reviewer's report:

Thanks for incorporating my previous comments in your protocol. And thanks for giving me the opportunity to review this protocol and I am looking forward to reading the review article.

Minor comments:

- In your third research question, please use related instead of correlated, since correlated is a more statistical term and also more likely to refer quantitative analyses. So if you revise your research question as "How are acculturation and mental health measured and related?), it will be more appropriate with your research methodology.

- Please be careful while using words like "All" (e.g. in Abstract: All forced migrants…).

- Even though you removed the sentence ""Conceptual framework analysis (CFA) will be used to synthesise systematic review findings." and added additional explanations, there is an abbreviation of CFA (p. 15 line 343) with no explanation, please revise this.
