Title: A systematic review of experimental methods to manipulate secondary hyperalgesia in humans: Protocol

Authors should refer "Submission Guidelines" carefully provided at the journal homepage, and I recommend following these narrowly.

I am not sure that the authors have the plan of systematic review only or systematic review and meta-analysis. If the authors have the plan about meta-analysis, they should present the planned general approach to synthesis of data. (e.g. whether aggregate or individual participant data will be used and whether a quantitative or narrative (descriptive) synthesis is planned) Besides, I recommend to describe detailed contents throughout the manuscript.

Statistical tools, software (R version) and statistical tests of pooled data should be mentioned precisely. And there is no exact plan for sensitivity test, or sub-group analysis by detail categorization.
