Reviewer’s report

Title: A population-based survey on physical inactivity and leisure time physical activity among adults in Chiang Mai, Thailand, 2014

Version: 0 Date: 02 May 2017

Reviewer: Eero Haapala

Reviewer’s report:

The Authors have improve the manuscript significantly. I have few minor comments.

1. P4,L10. "…can reduce mortalities [5,6]." or can reduce cardiovascular mordbidities and all-cause mortality?

2. P5,L8-9. Please describe more accurately how stages of change has been linked to PA. in the current form, this sentence is very inaccurate and does not provide much evidence for the reader.

3. P10, L18-19. The Authors nicely describe the link between SES and stages of change. I was wondering, if there are education x stages of change interactions on physical activity? I mean that are changes of stage similarly linked to physical activity in all education groups.
