Reviewer’s report

Title: Occupational burnout and lifestyle in Kazakhstan cardiologists

Version: 1 Date: 26 Feb 2019

Reviewer: Fatima Hassan

Reviewer's report:

Dear authors,

Kindly have a look at a few suggestions which I believe would further improve the article

1) there is no need to write N(%) in each column, instead it would look much better and professional if you follow this pattern

<table>
<thead>
<tr>
<th>Variable</th>
<th>All</th>
<th>Men</th>
<th>Women</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>N (%)</td>
<td>N (%)</td>
<td>N (%)</td>
</tr>
</tbody>
</table>

Age (years)
Work duration (years)

2) follow the same for all tables
3) The authors talk about use of t-test and Mann-Whitney U-test but no table shows the results of these test separately.
4) The conclusion at the end of manuscript is still very vague and incomplete.

I hope that the authors would look into these suggestions to further improve the article.

regards
