Reviewers report

Title: Effect of a Pedometer-based Walking Challenge on Increasing Physical Activity Levels amongst Hospital Workers

Version: 1 Date: 06 Jun 2019

Reviewer: Olivier Bruyère

Reviewers report:

This is still not very clear how the 194 subjects from the second cross-sectional study were selected. Are they part of the 212 initial sample? If not, the authors must assess the statistical significant difference between their baseline characteristics in table 1.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:

Acceptable

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?
If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
