Reviewer’s report

Title: Moral Orientations in Psychology: Contrasting Theoretical Perspectives

Version: 0 Date: 09 Dec 2018

Reviewer: Claus Christian CARBON

Reviewer's report:

The authors' major claim is that the relational development systems (RDS) approach represents "significant advancements for psychological research as a whole". This major aim shows two essential problems: first, the RD approach is the common approach used in most areas of psychology; second, we have to ask what the delta is between the current ms and the Lerner et al. (2015) paper.

Furthermore, the text does not follow a clear red line but oscillates from one argument to another.

Further, very minor points

* Please check the ref.list: some sources are not in accord with APA 6th ed., e.g. Kim et al. (2016) and Azim et al. (2016)

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
