Reviewer’s report

Title: Early maladaptive schemas as predictors of maternal bonding to the unborn child

Version: 1 Date: 14 Mar 2019

Reviewer: Amanda Cooklin

Reviewer’s report:

The authors have done a thorough and excellent job of responding to all of the detailed comments provided on the earlier version.

The data are much more 'manageable' now that the EMS is broken down into four domains (cf 18 individual items); and appropriate confounders / controls have been added to analyses, with interesting results (i.e. stronger relationships for rejection / disconnection).

No further comments to raise - a good job in the review response.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
