Title: Psychosocial Support for Parents of Extremely Preterm Infants in Neonatal Intensive Care: A Qualitative Interview Study

Version: 2 Date: 01 Aug 2019

Reviewer: Anabela Araujo Pedrosa

Reviewer's report:

The authors addressed all the comments and suggestions made previously, which resolved the concerns raised in the first review of this manuscript. Furthermore, they've clarified some terms and definitions used. The "Results" and specially the "Discussion" sections, following comments from other reviewers, where substantially shortened, and that makes them clearer and more focused on the objectives defined for this paper. This version is, therefore, of greater quality and pertinence. If published, it will add relevant information to this field of knowledge, but more importantly it draws significant implications for practice among health professionals working with this potentially vulnerable population (that are stated throughout "Discussion" and "Conclusion" sections).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
