Title: The relationship between existential well-being and mood-related psychiatric burden in Indian young adults with attachment deficits: A cross-cultural validation study

Version: 1 Date: 29 Sep 2019

Reviewer: John R. Peteet

Reviewer's report:

This is a well described study building on previous work, with clear explanations of the findings and their potential implications, as well as a reasoned acknowledgment of the study's limitations. My only concern is that I may not be able to adequately evaluate the statistics.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
