Title: Dichloroacetic acid-induced testicular toxicity in male rats and the protective effect of date fruit extract

Version: 0 Date: 13 Jan 2017

Reviewer: Yasser El-Sayed

Reviewer’s report:

This is a well-designed manuscript and will clearly add to our information regarding the ameliorative effect of date palm on chemical-induced oxidative testicular damage. Its design is reasonable. I think it can be published in the BMC Pharmacol. Toxicol. after minor revision. Please check the comments in attached file.
