Reviewer’s report

Title: Haloperidol affects bones while clozapine alters metabolic parameters - sex specific effects in rats perinatally treated with phencyclidine

Version: 0 Date: 15 Jul 2017

Reviewer: Kawa Dizaye

Reviewer's report:

The number of rats in each group and the routes of administration of the anti-psychotic drugs are not found in the Abstract.

It was better if the authors could prove induction of schizophrenia through studying the psychotic behaviors of the experimental rats.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
