Reviewer’s report

Title: Hypersensitivity reaction with multi-organ failure following re-exposure to rifampicin: case report and review of the literature including WHO spontaneous safety reports

Version: 0 Date: 28 Dec 2018

Reviewer: Nergiz Durmuş

Reviewer’s report:

This case report includes important primary "take-away" lessons. The authors discussed their case report in a wide perspective with other cases and WHO spontaneous safety reports. However, I consider that there are some minor issues that need to be addressed.

- Introduction should be revised with reference to appropriate medical literature.
- Clinical findings: Physical examination findings of the patient should be given.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
